

BEVISONNEERS

THE MERCEDES-BENZ FELLOWSHIP

PIONEER GRANT PITCH DECK

May 2026

This is my story..

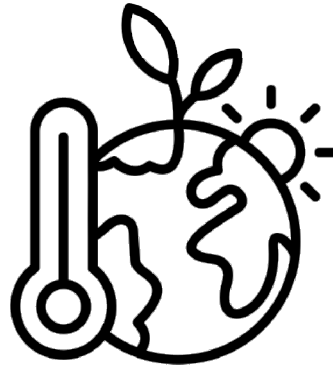

I was born and raised in a farming family in Rusizi Rwanda, where livestock was our safety net. But I watched as families lost their livestock and income, not because they were bad farmers, but because they could no longer afford to feed their animals. This is why I founded the **Green Livestock and Hydroponics Initiative**.

Problem

Livestock farmers face **high feed costs, climate challenges, and limited land**, making farming less profitable and unsustainable.

Feed prices rose
from **€0.18/kg**
(2015) to **€0.50+/kg today**

Climate change
reduces feed
availability

Limited land for
grazing

Solution

We produce **affordable hydroponic fodder** that grows in **7 days**, using **small space and recycled water**.

(Hydroponics means growing animal feed without soil, in a controlled system using stacked trays, where maize or wheat seeds grow into fodder)

Key advantages

Up to **50% cost reduction**

Climate-resilient

High nutrition

Saves **80% water**

Soaking → Germination → Growth → Harvest

BEVISIONEERS

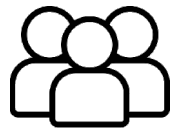

Validation & Traction

3m × 4m greenhouse. 1 ton/month production capacity

800+ kg fodder sold to FXB Rwanda

100+ paying farmers reached from Southern Rwanda.

200 youth trained in Western Rwanda with EU–GYM support. **20% adopted** hydroponic feeding

Registered on **Umucyo e-Procurement**

Selected among **Top 100 Innovative startups** in Rwanda by AMI

Environmental impact

- Saves up to 80% water
- Reduces land degradation
- Climate-resilient farming
- Soil-free production

Market opportunity

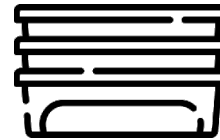

- Direct access to local AND cross-border markets (DRC & Burundi).
- Zero-grazing increases demand
- Climate change reduces grass availability
- Feed costs = 60 – 70% of livestock costs

Our Current Challenges

Manual irrigation

Few aluminum trays and equipment

Farmers need more awareness

Limited capital

Growth Strategy

How the grant will transform our operations

- Automated misting/foggy irrigation system will replace manual watering
- Solar energy integration
- 5 rainwater harvesting tanks
- Production doubling: scale from 1 to 5+ tons/month
- Train 5–10 cooperatives/youth groups.
- Hire 2 additional staff

Budget Breakdown

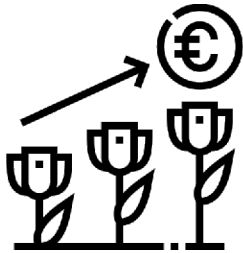

Grant request

Total funding requested: €20,000

Proposed budget breakdown

Investment Area	Est. Cost (€)	% of Grant
Automated misting/foggy irrigation system	€5,000	25%
Solar energy system (panels, inverter, battery)	€4,000	20%
Greenhouse expansion (double current capacity)	€3,500	17.5%
5 large rainwater collection tanks (<i>model; 10,000 L Afritanks</i>)	€3,000	15%
Additional aluminum trays and rack equipment	€1,200	6%
External experts hiring and training (2 new staff, 6 months) – One time salary	€1,000	5%
Operational Expenses: (<i>Truck rent for transporting fodder & water invoice for irrigation</i>)	€1,000	5%
Materials, Supplies, and Equipment: small supplies (wheelbarrow, seed incubation materials ...)	€500	2.5%
Cooperatives training programme	€500	2.5%
Soft ware and Licenses: domain, cloud, soft ware subscriptions	€300	1.5%
TOTAL	€20,000	100%

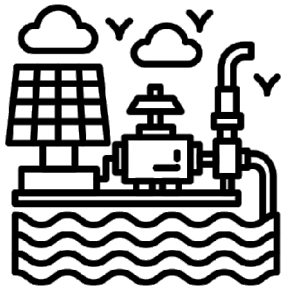

Path to sustainability

Production doubles → revenue increases (economies of scale)

Training fees create recurring income

Solar and rainwater cut costs by 30-40%

Cross-border markets expand revenue base (DRC & Burundi)

Revenue Streams & Pricing

Product / Service	Price	Customer Segment
Hydroponic fodder	€0.18 – 0.30 /kg	Farmers & cooperatives
Hydroponic fodder	€0.30 – 0.41 /kg	NGOs & institutions
Training & hydroponic system installation	Fee-based	NGOs, cooperatives, institutions

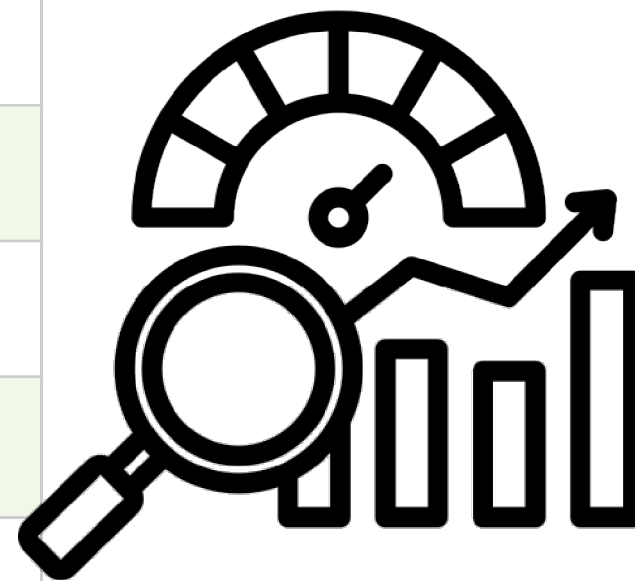

Revenue projections

Revenue Stream	Current/Month	Year 1 Post-Grant	Year 2
Hydroponic fodder sales (farmers, coops)	~€300	~€1,500	~€2,800
TOTAL (monthly)	~€300	~€1500	~€2,800

Cost to produce 1kg: ~€0.10 → Selling price ~€0.30/kg → Gross margin ~67%

KPIs — How we know we are succeeding

KPI	Current	Target (12 months)
Hydroponic fodder produced	~1 ton/month	5+ tons/month (after expansion)
Farmers reached / served	100+	300+ (incl. 5–10 cooperatives)
Youth trained in hydroponics	200	400+
Feed cost reduction for clients	Up to 50% reported	50% verified across 50+ farms
Monthly revenue from fodder sales	~€300/month (baseline)	€1,500+/month post-grant
Water recycled in irrigation	10% (watering cans)	80% recovery (post-misting system)

Founder / Team

✓ **Florent Iradukunda:**
Founder & Managing Director.
Holds a BBA.
5+ years in livestock farming.

✓ **Angelique Niyonsenga:**
Financial Manager.
Bachelor's degree in Accounting.
5 years as a Tax Adviser.

✓ **Alphonsine Nyiranzakizwanayo:**
Animal Veterinary
A1 qualification in Animal Health.
10+ years in livestock farming.

Why we are the right team

- We have lived experience in the communities we serve, we know the farmers, their challenges, and their trust dynamics

BEVISIONEERS

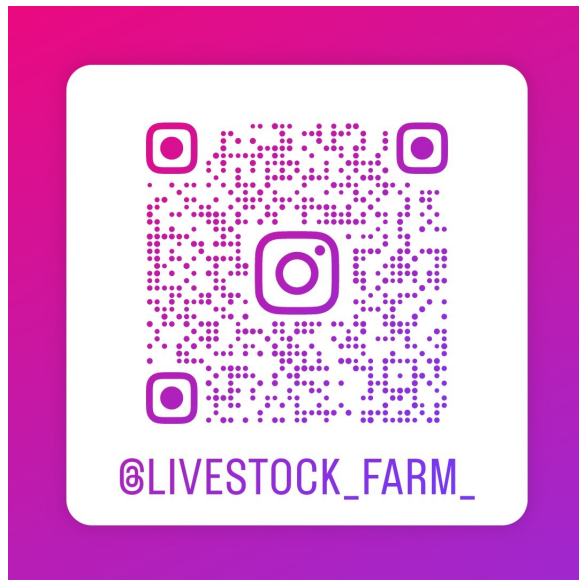

We are producing livestock feeds that are affordable and accessible for every Rwandan farmer, regardless of their income, size of land, or weather season.

With your support through the Pioneer Grant, we will expand our production to 5 tons per month, establish partnerships with farmer cooperatives and supply distributors, increase revenues, and train more farmers to feed their animals sustainably.

Thank you.

- Pay / Payez:** IRA-BUKUNDA Florent
- The sum of / La somme de:** millyoni imwe n'ibibumbi
- Signature:** moana atanu namukanga ibandatsi nicyenda
- Signature (S):** [Signature]
- Amount / Montant:** #1,569,000 RWF
- Sort Code:** 44-475
- Barcode:** 000000 221:4447551:4492918884 21

Competition Overview

Category	Competitor	Weakness	Our Advantage
Hydroponic Feed	Uruhimbí Kageyo Company	Located in Northern Rwanda (Gicumbi), far from Western region (10+ hrs transport)	Based in Western Rwanda (Rusizi) → closer to farmers, faster delivery, lower costs
Commercial / Industrial Feed	Tunga Feeds, Zamura Feeds, Gorilla Feeds, Huye Feeds	Expensive, depend on maize & soy (also needed for human food), affected by climate & imports	Up to 50% cheaper , uses less water, no competition with human food supply
Grass Feeding	Local farmers	Seasonal, needs land, low nutrition consistency	Year-round production , works in zero-grazing systems , uses very small space
Informal Sellers	Local traders	No quality control, unstable supply, price fluctuations	Consistent quality , reliable supply, farmer training included

Roadmap — Key next steps (12-month plan with grant)

Quarter	Milestone	Expected Outcome	Done
Q3 2026	Install automated misting irrigation system	80% water recovery; save 4+ hours/day labour	☐
Q3 2026	Install solar energy system for greenhouse power	Reduce electricity costs; ensure 24/7 operation	☐
Q3 2026	Purchase 5 rainwater collection tanks	Reliable, low-cost water supply during dry season	☐
Q4 2026	Expand greenhouse to double production capacity	Produce 5+ tons/month; meet existing demand backlog	☐
Q4 2026	Hire and train 2 additional staff members	Strengthen operations and management capacity	☐
Q1 2027	Train 5–10 cooperatives on hydroponic systems	300+ farmers reached; adoption rate target 30%	☐
Q1–Q2 2027	Enter DRC and Burundi cross-border markets	First cross-border fodder and training contracts	☐

Global Youth Mobilization Grant Application Decision - Successful

Congratulations! 🎉

We are delighted to inform you that your Youth Empowerment Fund (YEF) grant application for the project, **Green Livestock and Hydroponics Initiatives for Community Empowerment in Rwanda**, has been approved for **€5,000.00!**

Your unique Project ID is: **a13Sr000009k4cw**

We are thrilled to support your incredible work and can't wait to see the impact you'll create!

Dear Awardees,

Your payment from the Youth Empowerment Fund through Global Youth Mobilization has been sent and will be credited to your bank account shortly.

Please note that it may take a few working days for the funds to appear in your account, depending on your bank's processing times.

Important information:

- Global Youth Mobilization covers international transfer fees; however, receiving or intermediary banks may apply additional charges.
- Payments are processed in EUR. Where your bank account is not denominated in EUR, the amount will be converted into your local currency using the applicable exchange rate at the time of processing. As a result, the final amount received may vary slightly due to currency fluctuations.

Within the next couple of weeks, you will receive a form to confirm receipt of the funds or to report any issues.

If you have any questions, please contact eu-yef@globalyouthmobilization.org. We aim to respond within 2–5 working days.

TO WHOM IT MAY CONCERN

This is to testify that **Mr. Florent Iradukunda**, the Founder of **FILAOME Company Ltd**, is a supplier of chickens to the **FXB Village – The Light Foundation Project** beneficiaries in Gisagara and Nyaruguru Districts, from the beginning of project in 2023.

FILAOME Company Ltd supplied a total of **21,348 chickens and 800 kg of feeds** distributed to households living in extreme poverty. Beyond supply, Mr. Florent played a technical partner role of capacity building for project beneficiaries, focusing on proper animal care, disease prevention, housing, and productivity improvement.

FXB Rwanda strongly recommends him for relevant agriculture, food security, and sustainable livelihoods.

Emmanuel KAYITANA

Executive Director

CERTIFICATE OF GOOD COMPLETION

I, Florien Bimenyimana, hereby certify that **FILAOME COMPANY Ltd** (TIN: 121383031), represented by **Mr. Florent Iradukunda**, has successfully completed the supply of chickens and hydroponic feeds to **ACF COMPANY Ltd** over the past two (2) years, in accordance with the agreements established between our companies.

The scope of work was not limited to the delivery of chickens only. **FILAOME** also introduced and provided hydroponic training as an innovative solution to reduce the rising cost of animal feeds, enabling the local production of alternative green fodder. This intervention significantly contributed to lowering production costs, improving poultry performance, and strengthening the sustainability of our income-generating activities.

Based on their performance, **FILAOME COMPANY Ltd** is highly recommended without reservation for similar work within their technical and operational capacity.
